IMPACT OF MODERN TECHNOLOGY ON THE STUDENT PERFORMANCE IN HIGHER EDUCATION

Emmanuel Eshun-Davies
Essex University, United Kingdom
March 20, 2023

RESEARCH PROPOSAL OUTLINE

I. Introduction

- Background information on the impact of modern technology on higher education
- Research problem statement
- Research questions
- Significance of the study

II. Literature Review

- Include an improved version of the already done Literature review

III. Research Methodology

- Research design (quantitative, qualitative, or mixed-methods)
- Sampling strategy
- Data collection methods (survey, interviews, focus groups, observation)
- Data analysis plan
- Ethical considerations

IV. Results

- Presentation of findings
- Analysis of the relationship between modern technology and student performance in higher education
- Analysis of the relationship between technology use and student engagement, motivation, and satisfaction in higher education
- Analysis of why there could be contrasting results in similar or same setting/environment.

V. Discussion

- Interpretation of findings
- Discussion of implications for practice
- Discussion of limitations of the study
- Suggestions for future research

VI. Conclusion

- Summary of the research findings
- Concluding remarks
- Recommendations for further research

VII. References

- List of sources
